316 Later on wrecked boats provided Native smiths with iron to make
325 hoes, axes, etc. In certain villages there were regular forges,
412 (Matlharin, near Mbengelen Island, Matjolo etc.). The hoes
436 were in the well-known form of an ace of spades and were fixed into a wooden handle, as are also the axes, and battle axes (I. p. 453). But the principal supply of iron came from the Transvaal Mountains, especially from the Northern Zoutpansberg, where the Bveshas have practised the art of mining iron ore for an unknown period. These Sutho hoes have played a great part in the history of the Thonga tribe, having been extensively used as currency for lobolo purposes.

325 These Bveshas — the word is said to be a Thonga corruption of Venda — built their furnaces in ant-hills, as shown in the accompanying illustration supplied by M. H. Gros, near Iron Mountain, East of the Speionken district. They excavated three holes under the furnace, and blew into them by means of bellows made of a skin, the air being expelled through an antelope horn. The ore, broken in small pieces and mixed with charcoal, was smelted, crushed, smelted a second time, crushed again and made into hoes and axes, etc. Who had taught the Vendas this art? Did they learn it from the Ma-Lemba, that curious tribe, half Semitic in its customs, which invaded the Northern Transvaal during the XVIIIth century? Nobody knows for certain. I am under the impression that this art is older than that, as the Lebombo Natives, who invaded the Nondwane in the XVIth century, seem to have possessed iron weapons. The origin of iron and the date of its introduction into South Africa is still a mystery.

326 Among the ornaments illustrated will be found a very pretty
197 belt (No. 1).[1] It is the work of a young man named Philemon, living in the outskirts of Lourenço Marques, who employed his leisure moments in making objects of this description with twisted wires of iron, brass and copper, bent in festoons and
[197] fastened with small tongues of metal. European influence is doubtless very marked in these belts, but still they possess a certain cachet of their own. Amongst the Zulus as in our tribe, large cups of various descriptions, including egg-cups, are
